

FIAT Punto Standard Safety Equipment

SPECIFICATION

Tested Model	FIAT Punto 1.2 6v 65 CV E4 5p Easy
Body Type	- 5 door hatchback
Year Of Publication	2017
Kerb Weight	1030kg
VIN From Which Rating Applies	- all Puntos
Class	Small Family Car

SAFETY EQUIPMENT

	Driver	Passenger	Rear
FRONTAL CRASH PROTECTION			
Frontal airbag	٠	•	×
Belt pretensioner	٠	•	×
Belt loadlimiter	٠	•	×
Knee airbag	×	×	×
SIDE CRASH PROTECTION			
Side head airbag	0	0	0
Side chest airbag	0	0	×
Side pelvis airbag	0	0	×

Comments

The passenger compartment of the Punto remained stable in the frontal offset test. Dummy readings indicated good protection of the knees and femurs of both the driver and passenger but structures in the dashboard were thought to present a risk of injury to occupants of different sizes and to those sat in different positions. Protection of the passenger's chest was rated as marginal, based on dummy readings of compression. In the full-width rigid barrier test, protection of the chest of the rear passenger was weak, and that of the neck was marginal. Protection of the driver was good or adequate for all critical body regions. In the side barrier test, chest protection was rated as marginal, based on rib compressions. A side pole test was not performed as the Punto does not have a standard-fit head protecting airbag. Tests on the front seats and head restraints demonstrated poor whiplash protection in the event of a rear-end collision. A geometric assessment of the rear seats indicated marginal whiplash protection.

Restraint for 6 year old child: *Britax Römer KidFix XP* Restraint for 10 year old child: *Graco Junior* **Safety Features**

Comments

In the frontal offset test, measurements of tensile forces in the neck of the 10 year dummy indicated poor protection for that part of the body. Protection of the neck and chest of the 6 year dummy was marginal in this test. In the side barrier impact, decelerations indicated poor chest protection and weak head protection for the 10 year dummy. Protection of the 6 year dummy in that test was good for all critical body areas. The front passenger airbag can be disabled to allow a rearward-facing child restraint to be used in that seating position. However, the information provided to the driver regarding the status of the airbag is not sufficiently clear and the system was not rewarded. The Punto does not have i-Size compatible seats.

0 Pts

AEB Pedestrian

Comments

The protection provided by the bonnet to the head of a struck pedestrian was predominantly poor or weak, although good in places. The bumper provided good protection to pedestrians' legs and protection of the pelvis was also good or adequate.

SAFETY ASSIST

Total 0 Pts / 0%

Comments

The Punto has a seatbelt reminder only for the driver's seat as standard. The system on the passenger seat did not qualify for assessment as it is not standard equipment and, therefore, the car scored no points for the front seats. A seatbelt reminder is not available for the rear seats.
